
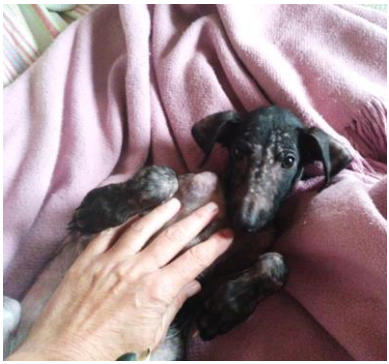
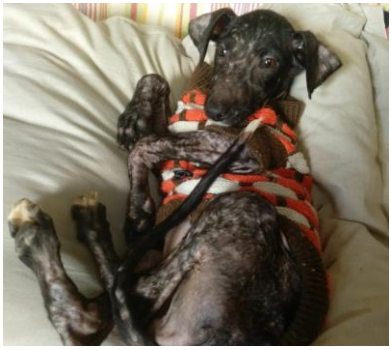
La historia de Audrey

Little sweet Audrey was found on November 7th 2019 in the fields surrounding Albacete.



She was so small that we thought she was only two months old but, when we looked at her teeth, we realized that she was almost five. Probably the lack of nutrients had kept her so small and it was a miracle that she was still alive.

The poor little baby was only skin and bones and the little energy she had, she would spend in scratching her itching body since her skin was full of bacteria and parasites.



We took her home and kept her attached to us, giving her very little amount of food every few hours and, after some days, the miracle happened again: her eyes that had remained lost in the void, looked suddenly at us with a cheerful expression, she waved her long tail for the first time and asked our old Zara to play with her!

From that moment, everything happened vertiginously fast, every day she learned new things and became strong and energetic. She enjoyed every

second of her life, discovered that, more than on the floor, she liked to walk over the furniture and did jumping exercises, sometimes more flying than jumping, that made us shiver with fear that she would hurt herself…
Very soon the time passed and, one day we received the happy and, at the same time sad news that she had found a forever family in France. A wonderful lady had read her story and wanted to offer Audrey her home…

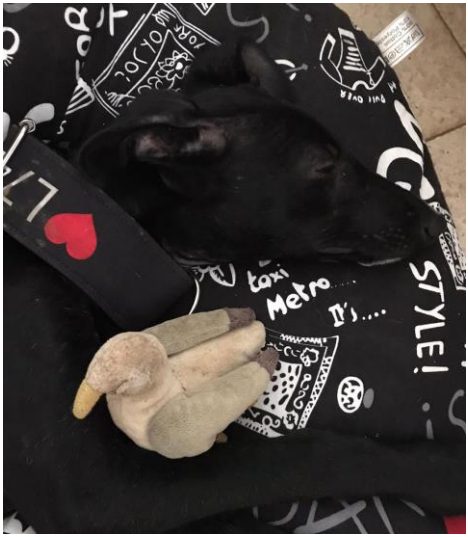
Thus, little Audrey visited the vet to ask him when she would be ready to travel to her new home. The vet said that she had improved very much, her skin was shining, she had gained 6 kg and she had get rid of all her parasites.
Her new mum celebrated it full of joy and ran to the store to buy her trousseau

We were very excited about her new home, since we had been told that there were many brothers and sisters waiting there for Audrey but we were also very sad to think that we would have her only for two more weeks, thus we decided to forget temporarily about the trip and enjoy being together, looking at her in her learning process to run and fly as a daughter of the wind ...

Without realizing, suddenly, the day of traveling to her new house arrived… We had been together for less than two months but it seemed that it had been much more, as if from the beginning of time, Audrey had lived in our home.

She arrived during the night, directly into the arms of her mum, who, full of tear received her as the treasure she is.

Audrey was very tired from the long trip and spent the night sleeping, she thought that she did not have to worry because this new home seemed very nice. She heard the voices of her new brothers and sisters and she was curious but she fell asleep before meeting them, all emotions would wait for the next day ...



And… when she woke up in the morning and went to the garden, she could not believe what her eyes were seeing…

There, there were so many four legged beings that she could not trust what her eyes were seeing. There were three wonderful galgas who reminded her very much her lovely mother…

…especially Creta, who adopted Audrey since the first minute and played with her never getting tired…

But there were also Tom and Jerry, amazing…. They were 5 years old and were smaller than Audrey, she could not believe it!!!!

It took several days for her to meet all the brother and sisters…

but ... how could be her sister this little stone with soft legs and a little head that sometimes disappeared under the stone?

Audrey thought her mother was joking, or that the French were very strange people ...

and the next day her dad introduced her to the youngest brother in the family, Audrey was fascinated by this soft, hairless, sweet and defenseless creature and loved and protected him since the first minute ...

and finally the most surprising creature she had ever seen ... she was brightly green colored and her name was Parakeety

and this is how our Audrey spends the days, growing up, learning, playing almost all the time with her brothers and sisters and sleeping very long naps under the sun, thinking, sometimes, that everything is a dream, but it's not…
